07 INSTALLAZIONE ARTISTICA

Le lastre sono in acciaio inossidabile, retroilluminate con luce led che produrrà un'illuminazione a muro soffusa e fissate a muro tramite una struttura che permette ad esse di ruotare e fondersi una su l'altra, creando dei giochi di luci e di forme che donano particolarità all'ambiente. La lastra presenta un'incisione che riprende le linee del quadro e l'immagine risulta incavata nella lastra senza perforarla completamente.

Acciaio inossidabile

Retroilluminazione led
